

PROFILE

Bachelor of Information Systems graduate specializing in Data Analysis and Business Intelligence (SQL, Power BI, Excel). Experienced in managing the entire data lifecycle from cleaning and validation to creating interactive dashboards to generate accurate business insights. A detail-oriented individual, communicative in data storytelling, and accustomed to collaborating with stakeholders to support strategic decision-making.

EDUCATION

Bachelor of Information Systems, Satya Wacana Christian University

- IPK : 3.73/4.0
- Relevant Coursework: Database System, Oracle Database, Data Management, Statistics

WORK EXPERIENCE

Department of Marine Affairs, Fisheries, Agriculture, and Food

Application Developer

August 2024 - December 2024
Tegal, Indonesia

- Developed and optimized data processing systems to support operations.
- Processed transaction data for performance monitoring and reporting needs.
- Increased data processing efficiency by 15% through system optimization.
- Collaborated in database management and improved storage efficiency by up to 25%.
- Supported the structuring of data for analysis and dashboard requirements

Department of Communication and Informatics

Data Analyst

January 2025 - March 2025
Salatiga ,Indonesia

- Processed and analyzed operational data into analytical reports and insights to support decision-making.
- Performed data cleaning and validation, improving data accuracy up to 95%
- Conducted descriptive analysis (trends & performance) to identify opportunities for performance improvement.
- Collaborated with cross-functional stakeholders in presenting data and insights.
- Improved reporting efficiency by 10% through structured data processing.

ORGANIZATIONAL EXPERIENCE

Faculty Student Council, Faculty of Information Technology

Secretary Staff

January 2023 – December 2023
Salatiga, Indonesia

- Supported the management team by creating and maintaining accurate records of all organizational meetings, reducing errors and inconsistencies by 15%.
- Coordinated and streamlined the administration of 40 proposals, resulting in a 20% increase in on-time submissions and a 30% decrease in errors
- Developed and implemented a comprehensive training program for new commission members, resulting in a 50% reduction in onboarding time and a 30% increase in member satisfaction

- Reviewed and revised the draft of the 2024 University Student Program Outline, ensuring alignment with department goals and objectives.
- Developed and implemented a training program for faculty members on effective work program management, resulting in a 15% increase in overall program quality.
- Conducted a comprehensive analysis of Proposal and Activity records at the university and faculty levels, identifying areas for improvement and streamlining processes, resulting in a 15% increase in overall efficiency.

PROJECTS

Telco Customer Churn Analysis | SQL, Python, Looker Studio

April 2026

- Analyzed 7,043 customer records to identify churn patterns and key behavioral factors.
- Segmented customers based on contract, tenure, and monthly charges to identify high-risk segments.
- Built churn visualizations to highlight key drivers and customer groups with the highest retention risk.

Conversion Funnel Analysis | SQL, Python, Looker Studio

April 2026

- Analyzed 5,000 customer records and 9,000 orders to evaluate the customer conversion funnel across e-commerce channels.
- Measured a purchase rate of 83.24% and identified 16.76% of customers who did not convert into buyers.
- Identified that only 1,764 orders (19.60%) were completed without returns, with a return rate of 13.07%, highlighting a major conversion leak.

FMCG Demand Forecasting | Python, XGBoost, LightGBM

April 2026

- Built an SKU-level demand forecasting model using historical FMCG sales data.
- Achieved the best performance with XGBoost (RMSE: 310.76), outperforming LightGBM (RMSE: 316.25).
- Generated forecasting output to support inventory planning and sales monitoring.

Sales Dashboard & Data Analysis | Excel & Looker Studio

April 2026

- Built an interactive dashboard with 5+ key visualizations (sales trend, region, product, profit).
- Processed 5000+ transaction records for KPI monitoring and business performance.
- Identified 5 key products contributing 30-40% to total sales.

TRAINING & CERTIFICATIONS

- Oracle Database Design and Programming with SQL
- Introduction to Data Analysis
- Crash Course on Python
- Python Project for Data Science
- Excel Basic For Data Analytics
- Data Visualization and Dashboards with Excel and Cognos

SKILLS

- Languages: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn)
- ML / Analytics: XGBoost, LightGBM, Scikit-learn, Descriptive & Trend Analysis
- BI & Viz: Power BI, Looker Studio, Excel (Advanced)
- Databases: Oracle Database, MySQL
